

CIRCULAR to the Classroom Coaching students of ACE:

In view of the present Lockdown conditions, all the students who have already enrolled and who wish to take admission in our regular **Classroom Coaching** for GATE:2021 & ESE:2021, at different centers of ACE Engineering Academy throughout India, are informed as follows:

To keep you engaged in your continuous preparation in the present Lockdown condition, we are providing you **Daily Online Live Classes** as per a specific time schedule (will be given separately) for each branch of engineering. These online live classes will continue till the normal conditions prevail to conduct the regular classroom coaching classes. The salient features of the proposed program are:

1. In this program some subjects will be covered through online live classes daily for about 3 to 6 hours along with online live doubt clarifications.
2. The theory part and practice questions will be covered in detail chapter-wise. Daily, some questions also will be given for your practice after the class. This questionnaire will be discussed on the next day before starting the online class.
3. Weekly mock tests on each chapter and grand test on the subject at the end of completion will also be conducted along with the paper discussion.
4. Subjects will be covered in detail one after the other in a proper sequence.
5. The entire printed study material which includes Theoretical synopsis booklets with practice questions, Previous GATE/ESE solved papers, Bits & Bytes Question booklets etc. will be sent to you through courier, once the courier services are resumed.
6. After the lockdown period, if normal conditions are established, some contact classes will also be arranged at the respective branch centre of ACE Academy for those subjects that have been covered through online live classes' mode. During the contact classes, the students can interact with the faculty member in person for any doubt and concept clarifications further.
7. Soon after the normal conditions are established, the remaining subjects will be covered at the respective branch center through our regular classroom coaching program.

A good rank in GATE/ESE fetches you a good career. This good rank demands a considerable time for dedicated preparation and thorough practice of mock exams. In this lockdown period the physical classroom coaching is not possible. Even after the lockdown period, there may be some restrictions and hence it may take probably a few more months to come to normalcy to conduct physical regular classroom coaching. Therefore, the above proposed program comprising of partly online live classes and partly through contact classes and classroom coaching, is the best possible way to make use the available time period for your effective preparation without any further delay.

We may upload soon, a detailed time schedule for the daily online live classes for each subject for each branch of engineering.

All the students who have already enrolled in our regular **Classroom Coaching programs** for GATE: 2021 & ESE: 2021, at different centers of ACE Engineering Academy throughout India, are advised to avail this opportunity to continue their preparation.

The other students who are willing to take admission in our upcoming regular classroom coaching batches for GATE: 2021 & ESE: 2021, at different centers of ACE Engineering Academy, are also given this facility. The exact date of commencement of daily online live classes for these upcoming batch students will be notified separately according to the commencement date of the respective batches.

It may be noted that the above proposed program is different from the '**Online/Digital Recorded Classes (Deep Learn)**' program already available with ACE Academy. The students of '**Online/Digital Recorded Classes (Deep Learn)**' program are not entitled to any extent to avail the proposed program since the coaching fee is different due to the additional infrastructure involved in the proposed program.

We advise you to avail this opportunity without any delay and waste of your valuable preparation time.

Wishing you good luck.
